ABSTRACT

Data collected in the fourth annual survey of use of residence hall facilities in the fall of 1977, as well as summary data from fall 1974 through fall 1977 is presented in tabular form. The study includes all state-operated institutions which have residence hall facilities except facilities available at locally sponsored community colleges under the SUNY program. The four tables of data for Fall 1977 are presented: Table 6 presents aggregated data that describe the original capacity of the residence hall facilities, the reductions to this original capacity, net available space and actual use; Table 7 provides more detailed data concerning the type of use of net available space - resident student use as well as other types of use are arrayed in categories, as described in the column headings; Table 8 focuses on resident student use - data are arrayed by institution, type of accommodation and rate paid by the students; and Table 9 arrays data regarding the number of resident students, the number of resident assistant bed rental waivers used, the number of resident assistants and the ratio of resident students to resident assistants by institution. The summary tables depict important segments of these data concerning use of residence hall facilities from fall 1974 through fall 1977. Trends in data reported to the Central Office during the four years of this study are shown in five separate tables covering: total use (headcount), percent of use, nonrevenue assignments, revenue producing use for purposes other than resident student occupancy (bedcount) and the ratio of students to resident assistants. Definitions of the basic concepts used in this report are provided. (Author/SPG)

-----------------------------	----

PREFACE

This report of Utilization of Residence Hall Facilities consists of data collected in the fourth annual survey of Fall 1977, as well as summary data from Fall 1974 through Fall 1977. Detailed tables for Fall 1974, Fall 1975 and Fall 1976 are available in earlier reports published by this office (see Publications List, page 27). Details regarding the residence hall program are crucial in the planning and budgetary functions of each institution. While the survey was specifically designed to meet the data requirements of the State University Central Administration Offices of Finance and Business and Academic Services, requests for these data have subsequently come from many sectors both inside and outside of the State University.

The study includes all State-operated institutions which have residence hall facilities. Any residence hall facilities available at locally sponsored Community Colleges under the program of the State University of New York are financed in a different manner and are not included in the study.

A study of this complexity could not have been completed without the full cooperation of the institutional respondents, other Central Staff Offices, and the professional, statistical and typing staff of the Central Staff Office of Institutional Research and Analytical Studies.

Tommy Annas
Director

Marie A. Bush
Assistant for
Institutional Research

INTRODUCTION

The methodology and definitions used in this study have been developed to be consistent with the University Guidelines for Utilization of Residence Hall Facilities and the State University of New York Policies and Procedures Manual. [Definitions of the basic concepts used in this report are provided,] beginning on page xi.

[The four tables of data for Fall 1977 may be described as follows:

- (1) Table 6 presents aggregated data which describe the original capacity of the residence hall facilities, the reductions to this original capacity, net available space and actual utilization;
- (2) Table 7 provides more detailed data concerning the types of utilization of net available space depicted in Table 6, - Resident student utilization as well as other types of utilization are arrayed in categories, as described in the column headings;

Table 8 focuses on resident student utilization summarized on Table 7. - Data are arrayed by institution, type of accommodation and rate paid by the students; and

Table 9 arrays data regarding the number of resident students, the number of resident assistant bed rental waivers used, the number of resident assistants and the ratio of resident students to resident assistants by institution.

The summary tables depict important segments of these data concerning utilization of residence hall facilities from Fall 1974 through Fall 1977. Trends in data reported to Central Office during the four years of this study are shown in five separate tables covering: total utilization (headcount), percent utilization, non-revenue assignments, revenue producing utilization for purposes other than resident student occupancy (bedcount) and the ratio of students to Resident Assistants.] The definitions over the four year period are consistent with those described beginning on page xi.

SUMMARY OF DATA

In the Fall of 1977, the total current utilization of residence hall facilities (headcount) was reported to be 62,339. This utilization represents an increase in utilization of one and one half percent compared to the Fall 1976 utilization (see below and see Tables 1 and 6). The net revenue adjusted design capacity for the Fall of 1977 was reported to be 61,453, a decrease of approximately one-half of one percent in adjusted capacity (see below).

Summary of Utilization of Original Design Capacity of Residence Hall Facilities State-Operated Institutions, State University of New York Fall 1974 through Fall 1977

Year	Original Design Capacity (bedcount)	Net Revenue producing adjusted design capacity (bedcount)	Total Utilization (headcount)	Percent Utilization of net revenue producing adjusted design capacity
Fall 1974	66,121	60,845	60,672	99.7
Fall 1975	66,121	60,785	62,025	102.0
Fall 1976	66,521	61,792	61,440	99.4
Fall 1977	66,569	61,453	62,339	101.4

The total current utilization is the largest headcount utilization reported since this survey was initially conducted during the Fall 1974 semester. Of the total utilization, 61,950 or 99.4 percent was for resident student utilization.

The average number of students per resident assistant has remained constant for the past four years (see Tables 5 and 9).

Revenue producing utilization of residence halls for purposes other than resident student occupancy continue to decline. This bedcount has been reduced from 1,351 in Fall 1974 to 389 in Fall 1977 (see Table 4). This trend corresponds with the State University's Guidelines which give first priority for utilization of residence halls to the housing needs of students.

Percent utilization of net revenue producing adjusted design capacity was reported to be 101.4 percent in the Fall of 1977. This utilization represents a two percent increase from the reported

SUMMARY OF DATA
(Continued)

99.4 percent utilization in the Fall 1976 (see Tables 2 and 6). Twelve of the twenty-five institutions surveyed report utilization of greater than 100 percent while six other institutions report utilization ranging from 94.5 percent to 99.6 percent. The Agricultural and Technical colleges continue to show a net utilization of greater than 100 percent occupancy. Fall 1977 data indicate an occupancy of 116.6 percent at these colleges (see Tables 2 and 6).

DEFINITIONS

Residential Capacity Descriptors

BEDCOUNT--a unit of measure used to describe the capacity of the facility for residential purposes.

ORIGINAL DESIGN CAPACITY--the original residential capacity of the facility (expressed as BEDCOUNT*) as determined by architectural plans.

• ADDITIONS TO ORIGINAL DESIGN CAPACITY--permanent conversions of on-campus facilities which increase their residential capacity (expressed as BEDCOUNT).

NON-REVENUE ASSIGNMENTS--residential capacity (expressed as BEDCOUNT) exempted from revenue production for special uses such as for RESIDENT ASSISTANTS. These assignments are subject to annual review by Central Administration.

NET REVENUE PRODUCING ADJUSTED DESIGN CAPACITY--the capacity of the facility expressed as BEDCOUNT, available for revenue producing uses. (ORIGINAL DESIGN CAPACITY, less NON-REVENUE ASSIGNMENTS, plus ADDITIONS TO ORIGINAL DESIGN.)

Actual Occupancy/Use Descriptors

HEADCOUNT--a measure of use which is the number of students or other persons occupying the facilities for residential purposes; or if the use of a facility is not residential (e.g. office space), then its use as expressed in terms of HEADCOUNT is the number of students displaced by the use of the facility for other purposes.

RESIDENT STUDENT OCCUPANCY--the HEADCOUNT of enrolled students and their spouses who reside in residence hall facilities. (This excludes RESIDENT ASSISTANTS.)

RESIDENT ASSISTANTS--students assigned to and residing in residence hall facilities for the purpose of peer counseling and betterment of the quality of life within the residence hall complex. The BEDCOUNT of facilities dedicated for RESIDENT ASSISTANT occupancy is exempted wholly or in part from revenue production.

OTHER USES--uses of residence hall facilities for non-residential purposes such as office space or classrooms, or for residential use by students from other colleges or special non-student residential occupancy.

*Terms in capital letters are defined elsewhere in the "Definitions".

DEFINITIONS
(Continued)

Utilization Indices

CURRENT UTILIZATION--the total actual utilization (expressed as HEADCOUNT) of an occupied facility's available revenue producing capacity. This is the sum of total RESIDENT STUDENT OCCUPANCY and total OTHER USES.

NET UTILIZATION--the CURRENT UTILIZATION less NET REVENUE PRODUCING ADJUSTED DESIGN CAPACITY. This figure is negative (-) if the facility is underutilized and positive (+) if the facility is overutilized.

^aExcludes Empire State College, College at Utica/Rome, College of Environmental Science and Forestry, College of Optometry and the Statutory Colleges.

^bIf headcount exceeds bedcount, the accommodation is over utilized or "crowded". If bedcount exceeds headcount the accommodation is under utilized.

^cBedcount of completely unoccupied rooms, suites or apartments.

^dIncludes rooms, suites and apartments.

^eOther types of accommodations, including septuples and octuples with the appropriate adjusted design capacity bedcount, and space used as sleeping quarters not originally designed for that purpose, such as lounges and study areas where the adjusted design capacity bedcount is zero.

^fIncludes accommodations designed as Double Special Rate.

^gSome beds briefly unoccupied as of census date.

^hIncludes converted study rooms.

Morrisville	1,996	64	64	31.2

^a Excludes Empire State College, College at Utica/Rome, College of Environmental Science and Forestry, College of Optometry and the Statutory Colleges.

^b Includes 13 students residing in residence hall facilities who attend Community Colleges. See Table 7 for details.

^c The students shown here as Resident Assistants have received whole or partial bed rental waivers and perform a range of assignments which vary in type and degree of commitment. Therefore, the ratios shown here do not necessarily reflect differences in Resident Assistant services available to students.
